

Press release

October, 2023

NEW GERMAN SUBSIDIARY SIROCO HVAC GmbH

- Serving local market
- Offering technological support
- Expanding Siroco distribution network

The SIROCO HVAC Group, a global supplier of thermal solutions for industrial vehicles, announces the creation of its new subsidiary SIROCO HVAC GmbH, based in Saarbrücken, Germany.

The opening of this new subsidiary is part of Siroco's ongoing international expansion, previously initiated with the opening of two subsidiaries on the Asian and African continents, with SIROCO INDIA PVT LTD and SIROCO HVAC MOROCCO. The modernisation of Siroco following its move in 2022 to 5,000 m² premises, which will increase its development, production and storage capacity, will promote SIROCO's commercial development in Europe and beyond.

SIROCO HVAC GmbH subsidiary will afford all German-speaking regions to benefit directly from SIROCO's range of products and services, including new technologies such as thermal management, heat pumps and electronics.

This local presence will enable the SIROCO Group to better support its German customers in terms of sales, technical support and proximity.

Siroco will continue to deploy its international presence and distribution network in and outside Europe to effectively serve its customers

About SIROCO HVAC

Siroco, an international supplier of thermal and electrical solutions for industrial vehicles, imagines, designs and manages comfort in cab for world's leading manufacturers via HVAC solutions. Well established in France, Germany, Morocco and India, Siroco focuses on the challenges of e-mobility and related technologies and expands its offer for markets as materials handling, construction, electric & urban vehicles, airport, etc.

Siroco designs, develops and manufactures and assembles Heating, Ventilation and Air-Conditioning (HVAC) systems for world's largest manufacturers. Siroco works jointly with customers at each stage of development, from initial design to series manufacturing, including testing, prototyping and industrial implementation.

From standard to customized units, SIROCO HVAC designs HVAC & E-HVAC systems to fit with OEM cabin constraints. Our technical teams bring optimal solution tested & approved in our premises.
